Mastering OpenCV with Practical Computer Vision Projects

By Shervin Emami

Packt Publishing. Paperback. Condition: New. 340 pages. Dimensions: 9.1in. x 7.5in. x 0.9in. Step-by-step tutorials to solve common real-world computer vision problems for desktop or mobile, from augmented reality and number plate recognition to face recognition and 3D head tracking. Overview Allows anyone with basic OpenCV experience to rapidly obtain skills in many computer vision topics, for research or commercial use. Each chapter is a separate project covering a computer vision problem, written by a professional with proven experience on that topic. All projects include a step-by-step tutorial and full source-code, using the C interface of OpenCV. In Detail Computer Vision is fast becoming an important technology and is used in Mars robots, national security systems, automated factories, driver-less cars, and medical image analysis to new forms of human-computer interaction. OpenCV is the most common library for computer vision, providing hundreds of complex and fast algorithms. But it has a steep learning curve and limited in-depth tutorials. Mastering OpenCV with Practical Computer Vision Projects is the perfect book for developers with just basic OpenCV skills who want to try practical computer vision projects, as well as the seasoned OpenCV experts who want to add more Computer Vision topics to their skill..
