I just started off reading this article pdf. It is probably the most remarkable ebook we have go through. It is extremely difficult to leave it before concluding, once you begin to read the book.

The removal of electric wires and their forests of poles can be accomplished by placing them either on alleys or Side streets or by meeting the question squarely and putting them underground. This would then help to preserve the trees in fine residential streets where too often the tops and centres of fine trees are cut away by linemen. The removal of unsightly overhanging Signs and bill boards can be affected if concerted action is taken by determined citizens. The encouragement of planting trees and ?owers and of sodding on resi dential streets commends itself, as does also the placing bf fountains and watering places. Artistic bridges are just as easily and as cheap ly built as heavy formal structures, and make a street more attractive, particularly if finished with neat balustrades and lamps. Street lighting, especially where the hydro-electric power system throughout the Province provides such a cheap and convenient source of electricity, lends itself to the ready adornment of streets, if the lighting scheme is carried out artistically.
