MULTIMODAL LEARNING OF GROUNDED CONCEPTS IN EMBODIED SYSTEMS

Shaker Verlag Mai 2010, 2010. Taschenbuch. Condition: Neu. Neuware - The research of methods equipping a technical system with the ability to learn mental concepts of objects, properties, or actions is an important step towards the understanding of intelligence. A special challenge arises from the variety of different characteristics whose association forms our understanding of a concept. For example the concept of a table might comprise a decisive collection of planarity, height, size, the action of placing something on the...
