BEGINNING GOOGLE MAPS APPLICATIONS WITH RAILS AND AJAX

Paperback. Book Condition: New. Not Signed; The Google Maps API is a showcase example of the Web 2.0 development paradigm, designed to be invitingly simple for developers to incorporate dynamic mapping services into Web applications. Beginning Google Maps Applications with Rails and Ajax takes a developer's perspective, showing how to integrate mapping features into their Rails-driven Web applications. The book shows how to draw on data sources such as the U.S. Census Bureau's TIGER/Line data and Google's own geocoding feature...

It is one of the most popular books. I am quite late in starting to read this one, but better than never. Once you begin to read the book, it is extremely difficult to leave it before concluding.
