Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Studies of the Essex Flora: A Complete Enumeration of All Plants Found Growing Naturally Within the Limits of Arranged According to the Natural System, With Copious Notes as to Localities and Habits A rather striking diversity, both in geological and botanical productions, appears in the territory under notice. From the western part of Swampscott an extensive formation of porphyry begins, and sweeping its northern limit along a gently curving line, follows the valley occupied by the well known Lakes of Lynn as far as the Sluice Pond, thence traverses the township of Lynn through its center, very nearly, and by a direction not far from east and west; then, passing the valley of Saugus River, in the neighborhood of Franker's Factories, trends gradually to the southwest and is lost in the hills of Malden and Medford. South of this line there is hardly anything but porphyry to be found in place; to the north there is next to none of it, but the region has all the usual characteristics of one which rests almost wholly on granite. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
