Continuum Publishing Corporation, United States, 2011. Hardback. Condition: New. Language: English . Brand New Book. With entries written by leading scholars in the field of Modern Philosophy, this is a complete one-volume reference guide to Leibniz's life, thought and work. G.W.F. Leibniz (1646-1716) was one of the great polymaths of the modern world. As well as being among the greatest Rationalist metaphysicians of the post-medieval age, he built the first mechanical calculator capable of multiplication and division, and developed the binary, base-two system. As a physicist, he made advances in mechanics, coining the term kinetic energy . As a mathematician, Leibniz invented calculus independently of Newton, and it is his notation, not Newton's, which is used to this day. Perhaps best known for the atomic concept of the monad, Leibniz also made outstanding contributions to symbolic logic, aesthetics, history, linguistics, and political theory. With entries written by leading scholars in the field of Modern Philosophy, this Companion is an accessible and authoritative reference guide to Leibniz's life, work and. The book includes extended biographical sketches, a time line and an up-to-date annotated bibliography. Gathering all these resources, this book will be an extremely valuable tool for those interested in Leibniz and the era in which he wrote. The Continuum Companions series is a major series of single volume companions to key research fields in the humanities aimed at postgraduate students, scholars and libraries. Each companion offers a comprehensive reference resource giving an overview of key topics, research areas, new directions and a manageable guide to beginning or developing research in the field. A distinctive feature of the series is that each companion provides practical guidance on advanced study and research in the field, including research methods and subject-specific resources.
