## Safety Engineering, Vol. 35 (Classic Reprint) (Paperback)

By Unknown Author

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Safety Engineering Vol. 35 an anthology of the monthly Journal of Safety Engineering, which in 1918 was still a relatively new field. Safety engineers develop procedures and design systems to avoid illness and accidents and to keep property from being damaged. The anthology encompasses the first six months of 1918. Appropriately, the book begins in January with a round-table discussion of America's entry into World War I and what safety engineers can contribute to the war effort. The journal focuses on making industrial production efficient and safe. Almost any product or process can be engineered to be safer, and everything from factory plant washing rooms to drinking fountains are discussed in detail. The subject of the February issue is the debate about whether machinery should employ mechanical guards or education to promote safety. The answer of the safety engineers is both, and this theme resonates throughout the anthology. Although it may be obvious to modern readers that both education and safer machines would contribute to fewer accidents, at the time these concepts were very new to employers. Safety engineers were...
