Mathematical Methods in Biology and Neurobiology (Paperback)

By Jürgen Jost

Springer London Ltd, United Kingdom, 2014. Paperback. Condition: New. 2014 ed.. Language: English . Brand New Book ***** Print on Demand *****.Mathematical models can be used to meet many of the challenges and opportunities offered by modern biology. The description of biological phenomena requires a range of mathematical theories. This is the case particularly for the emerging field of systems biology. Mathematical Methods in Biology and Neurobiology introduces and develops these mathematical structures and methods in a systematic manner. It studies: * discrete structures and graph theory * stochastic processes * dynamical systems and partial differential equations * optimization and the calculus of variations. The biological applications range from molecular to evolutionary and ecological levels, for example: * cellular reaction kinetics and gene regulation * biological pattern formation and chemotaxis * the biophysics and dynamics of neurons * the coding of information in neuronal systems * phylogenetic tree reconstruction * branching processes and population genetics * optimal resource allocation * sexual recombination * the interaction of species. Written by one of the most experienced and successful authors of advanced mathematical textbooks, this book stands apart for the wide range of mathematical tools that are featured. It will be useful for graduate students and researchers in mathematics and physics that want a...

Reviews

This pdf may be worth getting. It is actually written in straightforward words and not difficult to understand. You will not feel monotony at any moment of your respective time (that's what catalogs are for about should you request me).

-- Miss Golda Okuneva

Merely no words to clarify. I could comprehend almost everything using this published e publication. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Lori Terry
