Apress. Paperback. Condition: New. 248 pages. Apple Watch for Developers: Advice and Techniques from 5 Top Professionals gives you the base-knowledge and valuable secrets you'll need for your own projects from a core team of successful, experienced Apple Watch app-development experts. You'll explore elements such as branding within Watch apps, translating audio data into visual information, taming complex data, mastering environment-driven feature sets, and much more. This book is for developers who already have some knowledge of developing with WatchKit and WatchOS 2, and who are now interested in learning how to use them to create cutting edge Watch apps. It is written by five experienced, industry-leading Apple Watch developers who have created their apps early, and are now ready to pull apart examples to show you how to best create an Apple Watch app. This book will bring your cool Watch ideas to life! What you'll learn Accept and handle voice recognition on the Apple Watch Best send data back and forth from iCloud Perform functions that take very few taps of a screen Leverage frequency detection Run your apps natively on the Watch Work with App Groups to send and receive data Interface with synced Twitter accounts Who this book is for Apple Watch developers Mobile developers (primarily iOS) Table of Contents Chapter 1: Introduction Introduction to the Apple Watch for developers. Chapter 2: Voice Recognition and Home Remote Home Remote is an app that will allow you control a whole range of internet connected devices from your Today Screen or Apple Watch. It supports some hardware natively and is flexible enough to support hardware that it was not designed for by giving the users the ability to create their own Today Screen or Apple Watch buttons that can call a URL scheme, as well as passing along some bespoke data. The watch...
