Who Needs to Open the Capital Account?

By John Williamson

Peterson Institute. Paperback. Condition: New. 128 pages. Dimensions: 8.7in. x 5.8in. x 0.5in. Given the recent global economic crisis, Who Needs to Open the Capital Account considers the impact of capital account liberalization on global economic dynamics. Should capital controls, that limit foreign investment or domestic ownership of foreign assets, be put in place to prevent global imbalances? For investors, determining where to put capital is much like betting. Investors want to place their capital where they get the highest return, which means betting on emerging Asian countries with high interest rates and undervalued currencies. While poorer countries need more capital to grow, the authors ask if increased capital inflow can become too much of a good thing. A distinguished set of experts examine capital account liberalization and recommend ways to prevent a boom-bust cycle. They advocate reconciling domestic and international financial regulation that deals with boom-bust dynamics in domestic and international credit. The crisis changes the debate on capital account liberalization, and this volume argues that it could mark a reversal in the trend of financial liberalization at the core of the international financial system. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
