EFFICIENT MINING OF EMERGING PATTERNS IN TIME SERIES STOCK DATA

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | A Prediction Model | Data mining involves the use of different data analysis tools to find unknown patterns and relationships in large data sets. These tools could include statistical and mathematical models, and machine learning tools. The trading in a stock market involves understanding of various techniques and relevant methodology. Trend analysis and prediction played a vital role in practical stock trading. The data mining researchers have put in great efforts to...

Reviews

This pdf is definitely not straightforward to get started on studying but extremely exciting to see. It generally does not charge an excessive amount of. Your lifestyle period is going to be convert once you full looking over this publication.

-- **Elliott Rempel MD**

Certainly, this is actually the greatest job by any publisher. It is really simplistic but shocks within the 50 % of the pdf. I am just happy to tell you that this is the very best ebook i have read in my own lifestyle and may be the greatest ebook for actually.

-- **Marge Jacobson MD**
