Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: . of right ear. The movements, however, lasted only 70 seconds and were unattended by vertigo or nausea. The Hitzig test showed a normal response to 6 amp. of current from anode and cathode applied to either ear. Trigeminal Nerve and Mouth.--There is no paralysis in the muscles of the jaw. The conjunctival and orbicular reflexes are present. Pin point seems sharper on the left side of the face. This is noteworthy since the left side tions of these two nerves were normal, and showed no alterations in secretion, position of uvula, and vocal cords, phonation, swallowing respiration, or cardiac action. Spinal Accessory Nerve and Neck were normal. Hypoglossal Nerve and Tongue showed no departure from the normal. Mental Status was normal in all respects. Systemic Examination.--Revealed no abnormalities in pigmentation, sweat secretion, or vasomotor status. The temperature ranged from 982/s to 101 during his confinement...
