BROOKINGS INSTITUTION, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book. How private groups increasingly set public policy and regulate lives - with little public knowledge or attentionFrom accrediting doctors and lawyers to setting industry and professional standards, private groups establish many of the public policies in today s advanced societies. Yet this important role of non-governmental groups is largely ignored by those who study, teach, or report on public policy issues. Public Policymaking by Private Organizations sheds light on policymaking by private groups, which are unaccountable to the general public and often even to governments.This book brings to life the hidden world of policymaking by providing an overview of this phenomenon and in-depth case studies in the areas of finance, food safety and certain professions. Far from being merely self-regulation or self-governance, policymaking by private groups, for good or ill, can have a substantial impact on the broader public - from ensuring the safety of our home electrical appliances to vetting the credit-worthiness of complex financial instruments in the runup to the 2008 financial crisis.Ranging from non-profit associations to multi-national corporations, private policymaking groups are everywhere. They certify professionals as competent, establish industry regulations and set technical and professional standards. But because their operations lack the transparency and accountability required of governmental bodies, these organizations comprise a policymaking territory that is largely unseen, unreported, uncharted and not easily reconciled with democratic principles. As such, that territory demands to be fully explored, documented and understood. Even more urgently, private governance should be recognized and scrutinized as a distinct and important area in the field of public policy. Anyone concerned about how policies are made - and who makes them - should read this book.
