The theory of six degrees of separation is the idea that no one person or thing is more than six steps away from an introduction to the other. Four young men and women must learn what happens when the temperature rises and they find their lives in turmoil. Marcus involves himself in a forbidden romance that fuels a feud that is over a decade old while James finds himself falling for a new woman that will help him put his past behind him. Raquel has grown tired of fighting for Marcus and hopes this is the year he finally submits to their love. However, her best friend Liliana's homecoming sheds light on new infidelities, showing her that committing to him may no longer be an option.
