MICROFABRICATED TACTILE SENSORS FOR MINIMALLY INVASIVE SURGERY TOOLS

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Artificial tiny tactile sensors to compensate the lost sense of touch in minimally invasive surgery procedures | Minimally invasive surgery (MIS) procedures have been growing rapidly for the past couple of decades. In MIS operations, endoscopic tools are inserted through a small incision on human's body. Although these procedures have many advantages such as fast recovery time, minimum damage to human body and reduced postoperative complications, it does not provide any tactile feedback to the surgeon because...
