FEW-PHOTON COHERENT NONLINEAR OPTICS WITH A SINGLE MOLECULE

FAU University Press Mai 2017, 2017. Taschenbuch. Condition: Neu. Neuware - This thesis examines the interaction of light with single dibenzanthanthrene (DBATT) dye molecules. DBATT serves as a model for a quantum-mechanical two-level system. By means of strong focusing of the incident light and cooling of the dye molecules to temperatures below 2 K, a particularly efficient light-matter interaction can be realized. This enables observation of the nonlinearity inherent to a two-level system, e.g., in the form of saturation of...

A very great ebook with perfect and lucid answers. It can be packed with wisdom and knowledge I found out this book from my dad and i encouraged this publication to learn.

-- **Elena McLaughlin**

The ideal ebook i actually read through. It really is written in simple words and phrases and not confusing. Its been written in an remarkably simple way and it is just after i finished reading this ebook where in fact modified me, affect the way i think.
