Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Nuclear energy policy issues facing Congress include questions about radioactive waste management, research and development priorities, power plant safety and regulation, terrorism, the Price-Anderson Act accident liability system, nuclear weapons proliferation, plutonium disposition, and technology for producing nuclear fuel. Federal funding for nuclear energy research and development was substantially reduced by the Clinton Administration, and the Bush Administration proposed further cuts. However, in the Energy and Water Development Appropriations Act for FY2002 (P.L. 107-66), Congress generally rejected those reductions. President Bush's FY2003 budget request includes \$38.5 million for a Department of Energy (DOE) effort to encourage deployment of new commercial nuclear power plants by 2010. Several bills have been introduced in the 107th Congress to encourage the growth of nuclear power. A number of nuclear provisions are included in comprehensive energy legislation (H.R. 4) passed by the House August 2, 2001, and by the Senate April 25, 2002. The September 11, 2001, terrorist attacks on the United States raised questions about nuclear power plant security. Reactor security provisions were included in a Price-Anderson extension bill passed by the House November 27, 2001 (H.R. 2983). An extra \$36 million for nuclear power plant security was provided by the FY2002 supplemental appropriations .
