

## An Elementary Treatise on the Differential and Integral Calculus; With Numerous Examples

Filesize: 5.09 MB

### ***Reviews***

*Just no words to explain. Indeed, it is actually play, nevertheless an amazing and interesting literature. Its been written in an exceptionally simple way and is particularly simply following i finished reading through this ebook by which in fact altered me, alter the way in my opinion.*

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 edition. Excerpt: . Find in the line joining the centres of two spheres, the point from which the greatest portion of spherical surface is visible. The function to be a maximum is the sum of the two zones whose altitudes are AD and ad; hence we must find an expression for the areas of these zones. Put CM = E and cm = r, Cc = a and CP = x. The area of the zone on the sphere which has R for its radius (from Geometry, or Art. 194) =  $2\pi R \cdot AD$  =  $2\pi R \cdot (R - \sqrt{R^2 - r^2})$ ; and in the same way for the other zone, from which we readily obtain the solution.  $R^2 - r^2 = 24$ . Find the altitude of the cylinder inscribed in a sphere of radius r, so that its whole surface shall be a maximum. CHAPTER IX. TANGENTS, NORMALS AND ASYMPTOTES. 100. Equations of the Tangent and Normal-- Let P, (x, y,) be the point of tangency; the equation of the tangent line at (x1, y ) will be of the form (Anal. Geom., Art. 25)  $y - y_1 = a(x - x_1)$ , (1) in which a is the tangent of the angle which the tangent line makes with the axis of x. It was shown in Article 56a that the value of this tangent is equal to the derivative of the ordinate of the point of tangency, with respect to x, is the equation of the tangent to the curve at the...
