Use of Commercial DVDs as photoelectrochemical sensors

By Rizzi, Gian Andrea

Condition: New. Publisher/Verlag: Edizioni Accademiche Italiane | Cu₂O/TiO₂ nanostripes on a DVD as Photoelectrochemical Sensors | Cu₂O nanoparticles have been grown by pulse-electrochemical deposition on a digital versatile disc (DVD) which acts as a nanostructured electrode. Prior to Cu₂O deposition, the silver-coated rectangular-shaped grooves of the disassembled DVD were coated with a TiO₂ thin film by a modified sol-gel method. As demonstrated by atomic force microscopy (AFM) measurements, the DVD grooves are filled by a 120-130 nm thick TiO₂ film, while the thickness of the TiO₂ deposit on the crests is only ca. 50 nm. This inhomogeneous thickness leads to an inhomogeneous electric field when the DVD is used as electrode for depositing Cu₂O nanoparticles, which eventually leads to the growth of Cu₂O nanoparticles only on the DVD crests. A highly regular and reproducible Cu₂O/TiO₂ stripe-like heterostructure is obtained where both semiconducting oxides are aside. This system has been characterized by scanning electron microscopy (SEM), X-ray photoemission spectroscopy (XPS), Raman and photocurrent measurements. A possible use of this easy&cheap electrode as a visible light responsive sensor to water soluble organics in basic solution is suggested. | Format: Paperback | Language/Sprache: english | 52 pp.

Reviews

The best pdf i possibly go through. it was writtem quite properly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Miss Sienna Fay Jr.**

This ebook is very gripping and intriguing. I have got read through and i also am confident that i will gonna read through yet again again down the road. Its been written in an extremely straightforward way and it is merely right after i finished reading this book through which actually altered me, alter the way i really believe.
