

Performance Characteristics of Self-Report Instruments for Diagnosing Generalized Anxiety and Panic Disorders in Primary Care: A Systematic Review

Filesize: 2.43 MB

Reviews

This pdf may be really worth a read, and superior to other. It generally does not price too much. Once you begin to read the book, it is extremely difficult to leave it before concluding.

PERFORMANCE CHARACTERISTICS OF SELF-REPORT INSTRUMENTS FOR DIAGNOSING GENERALIZED ANXIETY AND PANIC DISORDERS IN PRIMARY CARE: A SYSTEMATIC REVIEW

DOWNLOAD

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Anxiety disorders are a major public health concern associated with functional impairment and increased use of the health care system. Two of the more common anxiety disorders are generalized anxiety disorder (GAD) and panic disorder (PD), which if identified, can be treated successfully with medications or psychotherapy. GAD is characterized by at least 6 months of persistent and excessive anxiety and worry that is difficult to control and is accompanied by three of six additional symptoms: restlessness, fatigue, decreased concentration, irritability, muscle tension, and sleep disturbance. PD, on the other hand, is episodic in nature and characterized by recurrent and unexpected panic attacks periods of intense fear or terror associated with autonomic arousal such as breathlessness, chest pain, or fear of losing control that become a cause of persistent concern in the patient. Generalized anxiety disorder (GAD) and panic disorder (PD) are two common mental illnesses that present in primary care clinics, often with physical symptoms that can inhibit appropriate diagnosis and treatment. Recognition of these disorders by primary care physicians is much lower than the expected rates in part due to somatic presentations but also due to the lack of routine screening that is in place for some other mental illnesses. Patients with anxiety disorders are often high utilizers of health care resources, and when their anxiety disorders are not diagnosed and treated, they can frequently undergo more expensive testing to rule out medical causes. Identification of accurate and feasible screening instruments for GAD and PD that have been validated in primary care settings have the potential to improve detection and facilitate treatment of these disorders within the primary care clinic, or to generate appropriate referral. Our report is a systematic review of...
