Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.MATLAB has the tools to work with large datasets and apply the necessary data analysis techniques. This book develops the work with hypothesis tests, analysis of variance and bayesian optimization. Big data analytics examines large amounts of data to uncover hidden patterns, correlations and other insights. With today's technology, it's possible to analyze your data and get answers from it almost immediately - an effort that's slower and less efficient with more traditional business intelligence solutions. Statistics and Machine Learning Toolbox provides parametric and nonparametric hypothesis tests to help you determine if your sample data comes from a population with particular characteristics. Distribution tests, such as Anderson-Darling and one-sample Kolmogorov-Smirnov, test whether sample data comes from a population with a particular distribution. Test whether two sets of sample data have the same distribution using tests such as two-sample Kolmogorov-Smirnov. Location tests, such as z-test and one-sample t-test, test whether sample data comes from a population with a particular mean or median. Test two or more sets of sample data for the same location value using a two-sample t-test or multiple comparison test. Dispersion tests, such as Chi-square variance, test whether sample data comes from a population with a particular variance. Compare the variances of two or more sample data sets using a two-sample F-test or multiple-sample test. Determine additional features of sample data by cross-tabulating, conducting a run test for randomness, and determine the sample size and power for a hypothesis test. Analysis of Variance (ANOVA) is a procedure for determining whether variation in the response variable arises within or among different population groups. Statistics and Machine Learning Toolbox provides one-way, two-way, and N-way analysis of variance (ANOVA); multivariate...
