

Visuelle Halluzinationen im hemianopen Feld bei homonymer Hemianopsie Schriftenreihe Neurologie Neurology Series German Edition

By H. W. Kölmel

Springer. Paperback. Condition: New. 132 pages. Dimensions: 9.5in. x 6.1in. x 0.4in. Highest level disorders of vision constitute a topic that is alluring, being obscure or even mysterious. For well over a century, neurologists have minutely studied visual receptors, the transmission of the impulse, the vagaries of ocular movements and pupillary anomalies, but they have relatively neglected the problems of what supervenes when disease afflicts the most caudal areas of the visual apparatus. Even the drama of total blindness is something from which neuro-ophthalmologists have tended to avert their gaze. We still await a definitive, single-author work embracing the whole gamut of centrally induced affections of sight. These remarks do not overlook the numerous communications, even major works, dealing with some isolated aspect of disordered visual perception. The German language literature has been outstanding in such intimate and exciting studies of various facets of a clinical gem elaborately cut. Dr. Kölmel's monograph bears out these views. Without resort to experimentation - for in such a project no animal model exists - the researcher has had to rely upon his clinical skills. Of vital importance was the information volunteered by the patient whose experiences are so bizarre,...
