Learn Apple HomeKit on the Mac and iOS: A Guide for App Developers, Hardware Producers, Contractors, Real Estate Professionals, and People Who Just Want to Turn On a Light

By Jesse Feiler

Apress. Paperback. Condition: New. 250 pages. Learn HomeKit on the Mac and iOS is the complete guide to Apples home automation technology (Home Kit). You'll learn the Home Kit platform structure and how it supports devices (existing and planned), and you'll get a thorough grounding on new and useful apps that deliver a new generation of home automation in a secure and innovative environment. For programmers, there's an entire chapter (plus sections in other chapters) dedicated to the core coding issues you'll need to learn. For non-programmers, this book is your perfect resource for easily getting your arms around the amazing potential of Apple HomeKit. The book shows you how to move to secure, integrated home automation projects that integrate with your digital world . . . automatically (after you set them up as described in the book). Having your calendar and appointments control your lights, locks, thermostat, and other home devices is the heart of home automation. In homes and small offices, you can banish notes taped to switches and controls that say, Do not turn off this switch or Leave the thermostat alone. The book gets you up to speed on HomeKit, and it also answers some of the...
