Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Wood Pattern-Making: A Text Book for the Use of High School, Trade School, Technical School and College Students An experience Of seventeen years in teaching pat tern-making and kindred subjects has made me feel the great need of such a work as this which I now Offer as a textbook for students in technical and manual training schools, and universities. A number Of excel lent books On the subject have been published, to be sure, but most Of them assume on their reader s part previous acquaintance with the fundamental ideas Of pattern-making; such as do treat at all of the element ary part Of the subject, happen to be works Of an exhaustive character, which are consequently too ex pensive for use as textbooks. The present work, therefore, will, it is hoped, find a field Of usefulness for itself It is Of course to be recognized that as pattern making is an art, it cannot be learned simply by reading any book on the subject, but only by practice. Still a textbook may afford valuable assistance even to the artisan. This work, however, has a further and more important purpose, - that Of imparting to the engineer or the draftsman the fundamental principles Of pattern making. For only as he is in possession of these can he make designs for patterns in accordance with which shopwork can be performed in the most efficient and most economical manner. The reader should also understand that this work, being designed only as an elementary treatise, in no way exhausts the subject. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction...
