Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Henry Draper Memorial: First Annual Report of the Photographic Study of Stellar Spectra Conducted at the Harvard College Other methods of enlargement have been considered, and some of them tried, with the object of removing the irregularities of the original spectra without introducing new defects. For instance, the sensitive plate may be moved during the enlargement in the direction of the spectral lines; a slit parallel to the lines may be used as the source of light, and the original negative separated by a small interval from the plate used for the copy; or two cylindrical lenses may be used, with their axes perpendicular to each other. In some of these ways the lines due to dust might either be avoided or so much reduced in length as not to resemble the true lines of the spectrum. The 15-inch refractor is now being used with a modification of the apparatus employed by Dr. Draper in his first experiments, - a slit spectroscope from which the slit has been removed. A concave lens has been substituted for the collimator and...
