The object is to fill in the missing numbers, in sequential order, going horizontally and vertically only. Diagonal paths are not allowed. Despite featuring numbers, math skills are not necessary. At the beginning, the game displays the location of the highest and smallest numbers, as well as some other numbers that serve as clues to solve the puzzle. To solve it, you complete a number matrix using logic. Numbricks puzzles are similar to Hidato. The most important difference is that it is only possible to move 1 node left, right, up, or down.
