LAP Lambert Academic Publishing Dez 2011, 2011. Taschenbuch. Book Condition: Neu. 220x152x41 mm. This item is printed on demand - Print on Demand Neuware - The author has researched and described many new concepts, ideas, researches, theories, macro-projects in space, technology and environment change. These all hold the promise for a true revolution in the lives of humans. Here, the author includes and reviews new methods for converting of any matter into energy, getting of super strong materials, travel in outer space without space suit, magnetic space launchers, magnetic space towers, motionless satellites and suspended structures, domes for cities, polar regions and space stations, control of local and global weather, wireless transfer of electricity to long distance, suppression forest fires without water, aerial gas pipelines, production of fresh water, etc. Author summarizes some of these revolutionary innovations for scientists, engineers, technical students, and the world public. Every chapter has three main sections: At first section the author describes the new idea in an easily comprehensible way acceptable for the general public (no equations), the second section contains the scientific proof of the innovation acceptable for technical specialists, and the third section contains the applications of innovation. 536 pp. Englisch.
