Spatial and Temporal Distribution of Dengue. A Case Study of Lahore

By Khalid, Anam

Condition: New. Publisher/Verlag: Anchor Academic Publishing | This study was conducted to evaluate the dengue outbreaks pattern in spatial and temporal contexts and to identify the meteorological constraints behind the spread. The aim was to gain a complete picture of the scenario. The Lahore District was selected as the study area which was affected by mosquitoes to a great extent. Lahore is the second largest city of Pakistan with respect to its population due to its rapidly growing urbanization. The environmental factors affecting the spread of the disease have been identified and then mapped in a GIS based environment by using all the spatial and tabular data obtained from different sources. The factors affecting dengue spread were found to be Land Surface Temperature (LST), Land cover/Land use, Normalized Difference Vegetation Index (NDVI), Temperature, Rainfall, and Population Density. | Format: Paperback | Language/Sprache: english | 116 gr | 220x155x4 mm | 64 pp.

Reviews

It in a single of my personal favorite pdf It really is writter in basic words instead of hard to understand. Your daily life period will be transform as soon as you complete looking over this pdf.
