Excerpt from The Relation of a Protective Tariff to Agriculture: Speech of Hon. Frank Hiscok, of New York, in the House of Representatives, Tuesday, April 20, 1884 After an exhaustive examination, I assert that the iron and steel used, by farmers, in whatever form used, into whatever machine, tool, or im plement fashioned, costs from 10 to 20 per cent. less now than in 1860. For like quality of goods the average reduction is more than 12 per cent. In many of the prominent articles it is 20 per cent. There is one more article of consumption I must mention, glass. The taxation of the poor man s window-glass that gave him heaven s light has been so often glowingly dwelt upon that it deserves a passing notice. I have time to take but one quality or grade, but that illustrates the whole list. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
