Brand New Book ***** Print on Demand *****.Excerpt from A Commercial Geography: For Academies, High Schools, and Business Colleges A large proportion of boys in schools expect to enter business life. Comparatively few have opportunity for the extended training given by a college course, and must depend upon the academy, the high school, or the commercial school for their preparation. The problem is to give boys, having a limited time at their command, the training and knowledge that will be of the greatest practical value in a commercial life. A good knowledge of what are known as fundamental branches is necessary; but, beyond these, it has been difficult to decide what branches of instruction will prove of greatest practical service. Political economy, civics, physics, chemistry, history, and the modern languages are helpful toward training the mind; but, if the languages be excepted, the branches named do not directly give the practical results that are so much needed. If some facts bearing upon the active commercial questions of the day could be brought within the scope of a text-book, it would seem to supply a want. Among these questions are, the routes and growth of commerce, - the production - centres and the markets of the world, - waterways and railways, and the increase of commerce as related to the growth of cities. The staple articles of commerce, their relative value and importance, would also deserve attention. With a view of partly, at least, fulfilling this, object, I have prepared this textbook of Commercial Geography. The need of such a book has been felt in my own school work, and it is hoped that other teachers may find it useful in giving pupils some ideas...
