S U M M A R Y R E P O R T from text); (2) document literacy (the knowledge and skills necessary to locate and use information in tables, charts, graphs, and maps); and (3) quantitative literacy (the knowl-edge and skills necessary to perform different arithmetic operations using information embedded in prose and document materials). Job Corps participants had higher average scores on these measures than the control group did, especially on the prose and quantitative dimensions. Job Corps raised participants average test scores by about four points on the prose scale, two points on the document scale, and five points on the quantitative scale. The impacts on the prose and quantitative scale are statistically significant at the 10 percent level. These gains were modest but sufficient to move two to four percent of participants from the lowest level of proficiency to the second lowest level. Employment and Earnings: Bridge to the Future Preparation for labor market success is a large part of Job Corps. Job Corps participation increases the time spent in academic classes and vocational training. We would expect that this increased education and training would increase participants skill levels and their labor market productivity. This increased productivity may in turn enhance earnings, time spent employed, wage rates, and fringe benefits for participants after they leave the program. A summary of our findings in these areas follows. Job Corps generated positive Job Corps generated positive earnings impacts beginning in...
