

Practical Astronomy and Geodesy; Including the Projections of the Sphere and Spherical Trigonometry. for the Use of the Royal Military Collège

Filesize: 4.67 MB

Reviews

This is actually the greatest pdf i have got go through until now. Indeed, it can be perform, nevertheless an amazing and interesting literature. Its been designed in an extremely simple way and is particularly only following i finished reading this ebook where really modified me, affect the way in my opinion.

FOR THE USE OF THE ROYAL MILITARY COLLEGE book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1845 Excerpt: . the sun, and through E imagine the rectangular co-ordinate axes EX, EY, Ez to be drawn, of which Ex and Ey are in the plane of the ecliptic, and the former passes through the equinoctial point T. Imagine S to be the place of a spot on the sun's disk, and s its orthographical projection on the plane of the ecliptic: again, let the co-ordinates Ex, EY of the point S be represented by x and Y, and ES by R; then since the angle T E S, the sun's longitude, is represented by L, we have $x = R \cos L$, $Y = R \sin L$. Let now Es be represented by r; also let the co-ordinates EX, EY, Ss of the spot S be represented by x, y, z; then Tes, the geocentric longitude of S, being represented by Z, and S E s, the geocentric latitude, by X, we have, as in art. 184., $x = r \cos X \cos L$, $y = r \cos X \sin L$, and $z = r \sin X$. Lastly, let the three rectangular co-ordinates of S, with respect to S, be x' (-sx) y' (sy) and z' (Ss), and let the semidiameter s S of the sun be represented by r: then, $x' = -x$, $y' = y$; and in these equations substituting the above values, we have for the equivalents of x, y...
