

The American naturalist Volume 34

By Essex Institute

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 268 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: . . . occurrence of Siamese twins does to the general idea that the human species is represented by separate individuals. This form of objection has certainly shown itself to be trivial. A much more serious obstacle comes from the work associated with the name of Apathy. This investigator has developed methods which in point of perfection exceed the Golgi Flc. 4. --Posterior view of a transverse section of the ventral nerve chain of a leech (modified from Apathy). The median plane of the leech is represented by D (dorsal), V (ventral). On the left side (), the nervous elements are represented according to the neurone theory, a sensory neurone being represented in solid black, and a motor one dotted. On the right side 1V the nervous elements are represented according to Apathy. The neurofibrils begin in or between the integumentary epithelial cells (), from which they pass centrally...
