Reviews

Simply no phrases to clarify. It is really basic but surprises from the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Not illustrated. 1906 Excerpt: .combination in which there are two points so situated that light passing through the eye on the meridian of least power will focus at a certain distance in relation to the retina, while the light passing through the strongest meridian will be focused a certain dioptric distance to the front. As the accommodation changes, these two points will move backward and forward, but their relative dioptric position will always be the same. The two meridians, that of the weakest and that of the strongest dioptric power, are called the principal meridians and the object of the test is to locate them exactly, followed by the exact measurement of the power of each. The two principal meridians are easily located when the astigmatism is at all marked, as the edge of light as seen in the pupillary area will then have two edges, opposite one another moderately well denned and straight, while in the direction at 90 degrees from this the edge is poorly denned and usually irregular in shape. Where the astigmatism is low the meridians can only be recognized when one of them is at the neutral point, that is, in the plane of the observer s eye. In fact this is the condition always in which the astigmatic appearance is most marked and no definite conclusion as to the direction of the two principal meridians should be reached until one of them has been neutralized. The exact locating of the principal meridians requires a...
