Brand New Book ***** Print on Demand *****.Excerpt from A Treatise on Analytic Geometry: Especially as Applied to the Properties of Conics: Including the Modern Methods of Abridged Notation In preparing the present treatise on Analytic Geometry, I have had in view two principal objects: to furnish an adequate introduction to the writings of the great masters; and to produce a book from which the topics of first importance may readily be selected by those who can not spare the time required for reading the whole work. I have therefore presented a somewhat extended account of the science in its latest form, as applied to Loci of the First and Second Orders; and have endeavored to perfect in the subject-matter that natural and scientific arrangement which alone can facilitate a judicious selection. Accordingly, not only have the equations to the Right Line, the Conies, the Plane, and the Quadrics been given in a greater variety of forms than usual, but the properties of Conies have been discussed with fullness; and the Abridged Notation has been introduced, with its cognate systems of Trilinear and Tangential Co-ordinates. On the other hand, to facilitate selection, these modern methods have been treated in separate chapters; and, in the discussion of properties, distinct statement, as well as natural grouping, has been constantly kept in view.
