AIR SURVEY OF SAND DEPOSITS BY SPECTRAL LUMINANCE

Springer. Paperback Condition: New. 158 pages. Dimensions: 11.0in x 8.3in x 0.3in This book gives an account of a method of determining the type composition of sandy deposits from the air by the nature of their reflection of radiant energy. The measured spectral luminance of a rock outcrop relative to the luminance of a standard is the basic property considered in this method. The spectral luminance factors p are measured by means of special instruments - a universal photometer,...
