

Impact of obesity on results of chemotherapy in breast cancer

By Violetta Sulzyc-Bielicka

LAP Lambert Academic Publishing Mrz 2016, 2016. Taschenbuch. Book Condition: Neu. 220x150x4 mm. Neuware - The main goal of induction chemotherapy for locally advanced breast cancer is feasibility of radical surgery or breast conserving surgery. The achieve pathologic complete response is proven to be the most important parameter of prognosis. The most commonly used preoperative chemotherapy regimens in breast cancer include anthracyclines and taxanes. The reports evaluating the impact of obesity on the obtained pathologic response to chemotherapy are divergent, This study was undertaken in patients with locally advanced breast cancer, treated with induction chemotherapy based solely on AT (doxorubicin plus docetaxel) regimen. We analyzed the relationship of obesity and overweight with pathologic response to neoadjuvant chemotherapy and survival. 64 pp. Englisch.

Reviews

This pdf may be really worth a read, and superior to other. It generally does not price too much. Once you begin to read the book, it is extremely difficult to leave it before concluding.
