

4D Visualization of Matter: Recent Collected Works of Ahmed H Zewail, Nobel Laureate

By Ahmed H. Zewail

Imperial College Press. Paperback. Condition: new. BRAND NEW, 4D Visualization of Matter: Recent Collected Works of Ahmed H Zewail, Nobel Laureate, Ahmed H. Zewail, Ever since the beginning of mankind's efforts to pursue scientific inquiry into the laws of nature, visualization of the very distant and the very small has been paramount. The examples are numerous. A century ago, the atom appeared mysterious, a raisin or plum pie of no structure, until it was visualized on the appropriate length and time scales. Similarly, with telescopic observations, a central dogma of the cosmos was changed and complexity yielded to simplicity of the heliocentric structure and motion in our solar system. For matter, in over a century of developments, major advances have been made to explore the inner microscopic structures and dynamics. These advances have benefited many fields of endeavor, but visualization was incomplete; it was limited either to the 3D spatial structure or to the 1D temporal evolution. However, in systems with myriads of atoms, 4D spatiotemporal visualization is essential for dissecting their complexity. The biological world is rich with examples, and many molecular diseases cannot be fully understood without such direct visualization, as, for example, in the case of Alzheimer's and...
