Energion Publications, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Climate Change has become a major topic of debate in today s politics, with some advocating serious changes in policy in response to it, and others suggesting that scientists and politicians are misreading, misrepresenting, and misapplying the data. Elgin Hushbeck, Jr. is not afraid to challenge scientific orthodoxy, and in fact believes it is very important that we do so. In this little book, he gives an introduction to a number of problems that he and others see with the apparent consensus view on this topic. His intention is to use this one case as a model for how we need to handle scientific data and dissent from consensus opinions in order to preserve the integrity of the scientific process. Is important data being ignored? Is it being interpreted to fit an existing view? How should we respond as a society? You ll have a chance to examine some of these questions in the pages of this book.
