

Synthesis and Characterization of Nanomaterials For Food Processing

By Madke, Er. Megharaj

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Nanotechnology now enters in food processing. Biosynthesis of silver nanoparticles using different method and Nanoparticles characterization is necessary to establish understanding nanoparticles synthesis. Characterization is done by using a variety of different techniques mainly drawn from material science common techniques are electron microscopy (TEM, SEM), atomic force microscopy (AFM) and ultraviolet-spectroscopy. Nanomaterials now in commercial use by the food industry, such as nano titanium dioxide, silver, zinc and zinc oxide. Nanotechnology has potential applications in all aspects of food processing nutritional additives, stronger flavourings and colourings, or antibacterial ingredients. | Format: Paperback | Language/Sprache: english | 56 pp.

Reviews

Merely no words to spell out. I am quite late in start reading this one, but better then never. I am happy to explain how this is actually the very best publication we have go through within my personal daily life and can be he best ebook for at any time.

-- Althea Christiansen

Unquestionably, this is actually the very best job by any publisher. It really is basic but unexpected situations within the 50 % from the book. I discovered this book from my dad and i advised this publication to discover.

-- Dr. Willis Walter
