Turning Victory Into Success: Military Operations After the Campaign was the title of a recent US Army Training and Doctrine Command Combat Studies Institute military symposium at Fort Leavenworth. The presenters looked at the imperative of linking battlefield success to political objectives across both tactical and strategic spectrums. One of the symposiums salient points was that overwhelming military accomplishment does not automatically translate to overall success. Major Tim Karchers *Understanding the Victory Disease, From the Little Bighorn to Mogadishu and Beyond* presents further evidence supporting the above premise. With Operations ENDURING and IRAQI FREEDOM in the foreground today, it is fitting that this study should focus on military operations undertaken in the immediate aftermath of extraordinary military victory. US military planners must possess a solid foundation of military history and cultural awareness to ensure battlefield and strategic success today and in the future. Future conflicts are not likely to resemble those of the past, whether they are conflicts from dim memory, the previous decade, or last year. Each brings its own challenges and dynamics. One thing is certain, however, as Major Karcher points out: The US military cannot rest on the laurels of previous campaigns. Major Karchers study makes an important contribution to military history as a warfighters tool to refine critical thinking and adaptability. As a result of Americas national strength and its demonstrated military prowess, US forces are quite susceptible to falling prey to the effects of the victory disease. The disease, by definition, brings defeat to a previously victorious nation or military due to three basic symptoms: arrogance, complacency, and the habit of using established patterns to solve military problems. The growth of the victory disease can best be analyzed through...
