RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 90 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Office of Biological and Physical Research, Physical Sciences Research Division, Office of Human Resources and Education, Education Division, 2001 OCLC Number: (OCoLC)55605693 Subject: Reduced gravity environments -- Study and teaching -- Activity programs -- United States. Excerpt: . . . 7 Project Team Activity Microgravity Teamwork Grades 3-12 Teacher Information It is never too soon to get students to work in cooperative teams or to develop career awareness. The technology design briefs in this guide suggest that students should be placed in teams whenever possible and assigned a career role. At the elementary level, students may need help understanding their role in a team. Also, they may need extra time to work out solutions to problems. At times, you may decide to be the principal investigator in order to get the activity started more efficiently. At the middle and high school levels, students All space missions are the result of teamwork, starting with will benefit from initial guidance concerning small groups like the one working out procedures for glovebox experiments (above) to large teams like the mission teamwork and increasing responsibility for managers directing the ASTRO-2 Spacelab mission (below). carrying out their career roles. The careers used in the following activity simulate NASA project teams. Introduction Many professional projects require people to work together effectively in teams. The success of the design and engineering activities students will do in each microgravity unit depends on teamwork. To have a good team, every member needs to do his or her assigned tasks well and on time. Students will work as a project team member in each of the activities in this guide. Students will set up...
