McDonald Woodward Publishing Company, US, United States, 2013. Hardback. Book Condition: New. Original.. 231 x 152 mm. Language: English . Brand New Book. Fresh water is one of the essential natural resources on Earth, and groundwater constitutes 98 of the liquid fresh water on the planet. Yet, throughout the world, groundwater resources are being depleted, allocated, squandered, contaminated -- but rarely is their fundamental value to humankind thought about or understood! Groundwater for the 21st Century is an effort to increase the groundwater literacy -- from local to global scales, among laymen, students, and professionals -- of citizens of planet Earth. Groundwater for the 21st Century provides two very important perspectives on the resource -- (a) a thorough yet accessible introduction to basic groundwater science and (b) a current, concise but comprehensive overview of groundwater resources and their importance, uses, status, management, and prospects in today s world.
