Reviews

The publication is simple in go through preferable to fully grasp. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

Throw precipitate from $(\text{N H}_4)_2\text{S}$ into solution. Test. Proceed with such examples as long as your time permits. VIII.--The whole subject may now be reviewed. A better method is to have several short theses submitted by each member of the class upon assigned topics. If a second year is allowed, the course in Qualitative Analysis may be further pursued, commencing with Thorpe Muir (Appleton s) and then passing to Quantitative Analysis, using Fresenius with Roscoe Schorlemmer for reference. II. Physics. An elaborate scheme is not necessary, as nearly all the recent books are arranged with greater uniformity and practical adaptability than the text books on chemistry. We would say in brief: --I.--Take up subjects in this order, (a.-Properties of matter, illustrating by the most simple b.-Molecular theory, experiments. c.-Attraction repulsion. II.--Review, questioning very closely. d.-Gravitation, weight, specific gravity. Here Organic Chemistry may be given as far as practicable, if it has not been treated under Carbon and its compounds. At most, you can only make prominent. Bread-making, Fermentation, (Alcoholic and Acetic), Soap-making and such practical subjects. t If the teacher is so situated that he can allow laboratory practice by pupils, now is the time to begin to let them handle the apparatus and work out the tests. It has not been necessary hitherto. III.--Continue the general order of subjects as treated in the text book, followed by further illustration and explanation. Invite questions...
