Excerpt from Norodom, King of Cambodia: A Romance of the East Reference to the map of Asia shows this kingdom to be a small part of the division of that continent com mouly known as Farther India, or indo-china. It lies toward the southern extremity of the main body of that peninsula, its limited sea-coast abutting upon the Gulf of Siam. Its restricted surface is divided almost in equal parts by the mighty stream which bears its name. This great river, also called the Mekong, finds its sources among the distant mountains of China proper, and empties its waters into the sea upon the coast of Cochin China.
