CELL MANIPULATION WITH ULTRASOUND

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | An approach for practical biomedical engineering | Design and Construction of a home-made ultrasound trapping device to manipulate and separate cells were conducted using ultrasound standing waves pattern created within the chamber between the source and the stainless steel reflector in the other side of the chamber. The effect of number of experimental conditions on trapping efficiency was conducted e.g. Wave intensity, Power, and application time. The performance two ultrasonic trapping chambers,...
