Createspace, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Religions and ideologies are increasingly becoming the fundamental cause of conflicts, pushing humanity ever closer to World War III; yet little has been revealed about their true origin. Religions and ideologies are actually originated from a mental disease. This disease thrives deep in the human psyche as a symbiosis between delusion and addiction. To be cured of the disease-to avoid another world-scale conflict-the human race needs to undergo serious psychotherapy, and that therapy rightfully should begin with a book. The physician author combines the academic features of a typical game with two specific yet related pathologies of the human brain. When he applies this integrated knowledge to analyze the world's major religions, ideologies, and their resulting conflicts, he discovers that all of these are games created by human imagination, nurtured and sustained by a vicious cycle between the two mental maladies of delusion and addiction. All of these games are phantoms and, in many ways, quite ludicrous. Nonetheless, the reader should refrain from contempt or derision because the weapons used in the games are indeed very real and becoming increasingly dangerous, threatening the survival of our species as well as the health of our planet.
