KINETICS FOR HOMOGENOUS REACTIONS: PROCESS ENGINEERING PERSPECTIVES

Balasubramanian Periyasamy
Kinetics for Homogenous
Reactions: Process
Engineering Perspectives

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This book describes a general kinetic modeling approach for homogeneous reactions occurring in a batch reactor on the context of process engineering perspectives. The kinetic modeling approach presented here explains how reaction stoichiometry can be described in terms of stoichiometric coefficient matrices. When the law of mass action kinetics is introduced, these matrices can be used to develop reacting component rate expressions that describe the evolution of molar concentrations in a constant...
