

Metastatic Neoplasms in Fine-Needle Aspiration Cytology : Diagnostic Tips and Traps

Filesize: 3.15 MB

Reviews

Extensive guide! Its this kind of great read. It is really simplistic but excitement from the 50 percent of your pdf. I am just quickly will get a pleasure of looking at a composed book.

(Tomas Bins)

METASTATIC NEOPLASMS IN FINE-NEEDLE ASPIRATION CYTOLOGY : DIAGNOSTIC TIPS AND TRAPS

Springer-Verlag Gmbh Nov 2015, 2015. Taschenbuch. Condition: Neu. Neuware - This book focuses primarily on the most efficient way to make an accurate FNA diagnosis of metastatic tumors within the broad confines of cytopathology. The text provides a step-by-step 'thought process' during the diagnostic approach of the metastatic tumors using detailed algorithms. Starting from the onsite immediate FNA sample assessment, the book provides strategy of specimen triage to facilitate further cytology evaluation based on the metastatic patterns and morphologic patterns of the tumors. In the subsequent chapter, the book provides tips and traps of selecting markers and interpretation of immunoperoxidase, flow cytometric, cytogenetic and molecular studies. The book includes the strategy of dealing with limited FNA material and wisely use existing samples (cell block, direct smear, cytospin) for different ancillary studies including molecular tests that have been used at MD Anderson. The author highlights challenging issues to show the importance of using a multidisciplinary (clinical, radiologic, cytologic and ancillary studies) approach. Extensive illustrations are provided. Metastatic Neoplasms in Fine-Needle Aspiration Cytology will provide pathology residents, fellows, practicing cytopathologists and cytotechnologists with a practical way to approach metastatic malignancies in daily cytology practice as well as provide a vision of the future of cytopathology. 185 pp. Englisch.
