(d) The new boiler and coal house located at the lower end of the grounds was specially built to accommodate four No. 1150 Heavy Duty Capitol Boilers. At present this building houses a battery of three of the above boilers, each having a rated capacity of 7800 square feet of radiation. They furnish the steam supply to warm all of the buildings, and provision is made in the boiler-room for the installation of a fourth boiler of similar size at some future period when additional power is desired. The photograph showing the boiler room and boilers affords a very good view of their setting and the sketch Figure 1, shows the manner in which they are cross-connected, from which it will be noted that any one, two or...
